Next Steps:

- Figure out several ideas
- Ask Claude then to make sure magnitude of existing competitors

Timeline:

- **@Everyone: brainstorm individual proposal ideas & submit markdown to github repo (2-3 ideas)**
    - **Per idea:**
        - **Datasets used:**
        - **Main tech used:**
        - **What's the application/gap (Keep it narrow!):**
- **@Thu Sep 3:**
- **Sep 8?: Submit Pre-Proposal**

Project Ideas:

Anomaly Use Cases: Easily manipulated trigger → anomaly detection → show output

- Auto driving: kid coming out on the street, unique anomaly cases
    - Waymo car encounters large puddle
    - Traffic construction cones
    - Truck carrying construction cones
    - **Datasets: Waymo, Zoox**
    - @Alejando to review
- Phone detection
- Car - simulation, parking space saving
